

***Mass General Brigham Infection Prevention Standards
for Suppliers/Businesses***

All individuals from a vendor/supplier (“Supplier Employees”) who will be working onsite for one day or more at any Mass General Brigham facility or patient home must meet the **Influenza Vaccination Requirement** described below.

In addition, all Supplier Employees who will be working onsite at a Mass General Brigham hospital, healthcare facility, or patient home(s) for longer than a duration of 3 weeks (120 cumulative hours over the course of a year) must meet the **Additional Infection Prevention Requirements** described below.

Influenza Vaccination Requirement

Supplier Employees must be vaccinated *if working on-site at any Mass General Brigham facility or patient home for one day or more*. Suppliers should ensure employees assigned to Mass General Brigham facilities have completed the required vaccination. Documentation should be maintained by Supplier and provided to Mass General Brigham upon request.

Description

Influenza Vaccine

The Seasonal Flu Vaccine is required if working during flu season (September 15-April 30th)

Additional Infection Prevention Requirements

Supplier Employees must also meet the following additional infection prevention requirements *if working on-site at a Mass General Brigham health care facility or patient home for more than three weeks (120 cumulative hours over the course of a year)*. Clinical documentation (not self-attestation) should be maintained by Supplier and provided to Mass General Brigham upon request.

Description

Tuberculosis (TB) –Screening Required (*One of the following is required*)

A	For individuals with a history of a negative TB Screening, must have documentation of TB skin test screening within 3 months of start date OR Documentation of a negative QuantiFERON TB Test or T-spot (blood test for TB) within 3 months of start date
B	For individuals who are positive on a TB skin test or a TB blood test such as the QFT or T-spot, documentation of a chest x-ray which indicates there is no active tuberculosis is required. In addition, a TB Symptom Survey to determine there are no symptoms suggestive of TB infection must be completed using the attached Tuberculosis (TB) Screening Form. This form should be maintained by the employer.
