

***Mass General Brigham Infection Prevention Standards
for Suppliers/Vendors (“Businesses”)***

All individuals from a vendor/supplier (“Business Employees”) who will be working onsite for one day or more at any Mass General Brigham facility must meet the **COVID-19 and Influenza Vaccination Requirements** described below.

In addition, all Business Employees who will be working onsite at a Mass General Brigham hospital or healthcare facility for longer than a duration of 3 weeks (120 cumulative hours over the course of a year) must meet the **Additional Infection Prevention Requirements** described below.

COVID-19 and Influenza Vaccination Requirements

Business Employees must be vaccinated if working on-site at any Mass General Brigham facility for one day or more. Businesses should ensure employees assigned to Mass General Brigham facilities have completed the required vaccinations. Documentation should be maintained by Business and provided to Mass General Brigham upon request.

Description

Influenza Vaccine

The Seasonal Flu Vaccine is required if working during flu season (September 15-April 30th).

COVID-19 Vaccine

COVID-19 vaccination is required. Fully vaccinated is currently defined by Mass General Brigham as completion of CDC recommended vaccinations for COVID-19, which includes primary series and booster, of any WHO authorized vaccines: <https://covid19.trackvaccines.org/agency/who/>). This definition is subject to change.

Additional Infection Prevention Requirements

Business Employees must meet additional infection prevention requirements if working on-site at a Mass General Brigham health care facility for more than three weeks (120 cumulative hours over the course of a year) Clinical documentation (not self-attestation) should be maintained by Business and provided to Mass General Brigham upon request.

Description

Tuberculosis (TB) –Screening Required (One of the following is required)

A	For individuals with a history of a negative TB Screening, must have documentation of TB skin test screening within 3 months of start date OR Documentation of a negative QuantiFERON TB Test or T-spot (blood test for TB) within 3 months of start date
B	For individuals who are positive on a TB skin test or a TB blood test such as the QFT or T-spot, documentation of a chest x-ray which indicates there is no active tuberculosis is required. In addition, a TB Symptom Survey to

Additional Infection Prevention Requirements

Business Employees must meet additional infection prevention requirements if working on-site at a Mass General Brigham health care facility for more than three weeks (120 cumulative hours over the course of a year) Clinical documentation (not self-attestation) should be maintained by Business and provided to Mass General Brigham upon request.

Description

determine there are no symptoms suggestive of TB infection must be completed using the attached **Tuberculosis (TB) Screening Form**. This form should be maintained by the employer.
